

CLAIMS

WHAT IS CLAIMED IS:

1. A three dimensional air cushion comprising:
at least one air chamber having a sealed peripheral edge and a geometric shape,
a hollow area surrounded by said sealed peripheral edge, and
a projected area of said hollow area being smaller than a surface area of said air cushion.
2. A three dimensional air cushion comprising:
at least one air chamber having a sealed peripheral edge and a geometric shape,
and
an inner surface area of said air cushion being smaller than an outer surface area of said air cushion.
3. A three dimensional air cushion comprising:
at least two air chambers communicating with each other, and
at least one elongated recessed groove separating said air chambers, said at least one elongated recessed groove having two ends, each of said two ends having a surface extending generally vertically to a projected elevational surface of said at least one recessed groove.
4. The three dimensional air cushion as claimed in claim 1, wherein said at least one air chamber has two opposite sides extending upward to have an upper end with a higher level than an intermediate portion of said at least one air chamber.
5. The three dimensional air cushion as claimed in claim 2, wherein said at least one air chamber has two opposite sides extending upward to have an upper end with a

higher level than an intermediate portion of said at least one air chamber.

6. The three dimensional air cushion as claimed in claim 3, wherein said at least two air chambers have two opposite sides extending upward to have an upper end with a higher level than an intermediate portion of said at least two air chambers.

7. The three dimensional air cushion as claimed in claim 1, wherein said at least one air chamber is sealed.

8. The three dimensional air cushion as claimed in claim 2, wherein said at least one air chamber is sealed.

9. The three dimensional air cushion as claimed in claim 3, wherein said at least two air chambers are sealed.

10. The three dimensional air cushion as claimed in claim 1, wherein said air chamber has a one-way valve to communicate with open air.

11. The three dimensional air cushion as claimed in claim 2, wherein said air chamber has a one-way valve to communicate with open air.

12. The three dimensional air cushion as claimed in claim 3, wherein said air chambers have a one-way valve to communicate with open air.

13. The three dimensional air cushion as claimed in claim 1, wherein an upper surface is provided with at least one recessed elongated groove and a lower surface is flat and smooth.

14. The three dimensional air cushion as claimed in claim 2, wherein an upper

surface is provided with at least one recessed elongated groove and a lower surface is flat and smooth.

15. The three dimensional air cushion as claimed in claim 3, wherein an upper surface is provided with at least one recessed elongated groove and a lower surface is flat and smooth.

16. The three dimensional air cushion as claimed in claim 1, wherein a lower surface is provided with at least one recessed elongated groove, and a upper surface is flat and smooth.

17. The three dimensional air cushion as claimed in claim 2, wherein a lower surface is provided with at least one recessed elongated groove, and a upper surface is flat and smooth.

18. The three dimensional air cushion as claimed in claim 3, wherein a lower surface is provided with at least one recessed elongated groove, and a upper surface is flat and smooth.

19. The three dimensional air cushion as claimed in claim 1, wherein an upper surface and a lower surface are provided with at least one recessed elongated groove.

20. The three dimensional air cushion as claimed in claim 2, wherein an upper surface and a lower surface are provided with at least one recessed elongated groove.

21. The three dimensional air cushion as claimed in claim 3, wherein an upper surface and a lower surface are provided with at least one recessed elongated groove.

22. The three dimensional air cushion as claimed in claim 19, wherein said

elongated recessed grooves provided in said upper surface and lower surface are connected with each other.

23. The three dimensional air cushion as claimed in claim 20, wherein said elongated recessed grooves provided in said upper surface and lower surface are connected with each other.

24. The three dimensional air cushion as claimed in claim 21, wherein said elongated recessed grooves provided in said upper surface and lower surface are connected with each other.

25. The three dimensional air cushion as claimed in claim 1, wherein said air cushion is a component in one of a shoe, a sneaker, a protective pad, and a helmet, for providing a buffer and shock-absorbing effect.

26. The three dimensional air cushion as claimed in claim 2, wherein said air cushion is a component in one of a shoe, a sneaker, a protective pad, and a helmet, for providing a buffer and shock-absorbing effect.

27. The three dimensional air cushion as claimed in claim 3, wherein said air cushion is a component in one of a shoe, a sneaker, a protective pad, and a helmet, for providing a buffer and shock-absorbing effect.

28. The three dimensional air cushion as claimed in claim 1, further including an inlet for filling fluid.

29. The three dimensional air cushion as claimed in claim 2, further including an inlet for filling fluid.

30. The three dimensional air cushion as claimed in claim 3, further including an inlet for filling fluid.

31. The three dimensional air cushion as claimed in claim 28, further including a valve device.

32. The three dimensional air cushion as claimed in claim 29, further including a valve device.

33. The three dimensional air cushion as claimed in claim 30, further including a valve device.

34. The three dimensional air cushion as claim in claim 28, further including a pump device.

35. The three dimensional air cushion as claim in claim 29, further including a pump device.

36. The three dimensional air cushion as claim in claim 30, further including a pump device.

37. The three dimensional air cushion as claims 28, wherein said air chamber is filled with a liquid fluid.

38. The three dimensional air cushion as claims 29, wherein said air chamber is filled with a liquid fluid.

39. The three dimensional air cushion as claims 30, wherein said air chambers are filled with a liquid fluid.

40. The three dimensional air cushion as claimed in claim 28, wherein said air chamber is filled with semi-liquid fluid.

41. The three dimensional air cushion as claimed in claim 29, wherein said air chamber is filled with semi-liquid fluid.

42. The three dimensional air cushion as claimed in claim 30, wherein said air chambers are filled with semi-liquid fluid.

43. The three dimensional air cushion as claimed in claim 28, wherein said air chamber is filled with foam material.

44. The three dimensional air cushion as claimed in claim 29, wherein said air chamber is filled with foam material.

45. The three dimensional air cushion as claimed in claim 30, wherein said air chambers are filled with foam material.

46. The three dimensional air cushion as claimed in claim 28, wherein said air chamber is filled with a gas other than air.

47. The three dimensional air cushion as claimed in claim 29, wherein said air chamber is filled with a gas other than air.

48. The three dimensional air cushion as claimed in claim 30, wherein said air chambers are filled with a gas other than air.

2. CITATIONS AND EXPLANATIONS

Claims 1-3 and 7-48 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the newly amended feature of a U-shaped air passage extending out of the plane of the cushion. Claims 1-3 and 7-48 meet the criteria set out in PCT Article 33(4) for industrial applicability since the inventions would find utility in the shoe industries.

ATTENTION

The applicant should carefully check the data appearing in this Notification. In case of any discrepancy between these data and the indications in the international application, the applicant should immediately inform the International Bureau.

In addition, the applicant's attention is drawn to the information contained in the Annex, relating to:

- ☒ time limits for entry into the national phase;
☐ confirmation of precautionary designations;
☐ requirements regarding priority documents.

A copy of this Notification is being sent to the receiving Office and to the International Searching Authority.

INFORMATION ON TIME LIMITS FOR ENTERING THE NATIONAL PHASE

The applicant is reminded that the "national phase" must be entered before each of the designated Offices indicated in the Notification of Receipt of Record Copy (Form PCT/IB/301) by paying national fees and furnishing translations, as prescribed by the applicable national laws.

The time limit for performing these procedural acts is **20 MONTHS** from the priority date or, for those designated States which the applicant elects in a demand for international preliminary examination or in a later election, **30 MONTHS** from the priority date, provided that the election is made before the expiry of 19 months from the priority date. Some designated (or elected) Offices have fixed time limits which expire even later than 20 or 30 months from the priority date. In other Offices an extension of time or grace period, in some cases upon payment of an additional fee, is available.

In addition to these procedural acts, the applicant may also have to comply with other special requirements applicable in certain Offices. **It is the applicant's responsibility** to ensure that the necessary steps to enter the national phase are taken in a timely fashion. Most designated Offices do not issue reminders to applicants in connection with the entry into the national phase.

For detailed information about the procedural acts to be performed to enter the national phase before each designated Office, the applicable time limits and possible extensions of time or grace periods, and any other requirements, see the relevant Chapters of Volume II of the PCT Applicant's Guide. Information about the requirements for filing a demand for international preliminary examination is set out in Chapter IX of Volume I of the PCT Applicant's Guide.

Note that since ES is not bound by PCT Chapter II (which provides for the international preliminary examination procedure), that State cannot be elected in a demand for international preliminary examination. In the case of the designation of ES for a national patent, the applicant must thus always enter the national phase before the national Office of that State before the expiration of 20 months from the priority date. In the case of the designation of ES for a European patent, however, the 31-month time limit applies in respect of that designation if at least one other State designated for a European patent is also elected within the 19-month period.*

Note also that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination.

- * CH and LI became bound by PCT Chapter II on 1 September 1995. GR became bound by PCT Chapter II on 7 September 1996. Therefore, CH and LI may be elected in a demand or a later election filed on or after 1 September 1995, and GR may be elected in a demand or a later election filed on or after 7 September 1996, regardless of the filing date of the international application. (See 2nd paragraph above.)

CONFIRMATION OF PRECAUTIONARY DESIGNATIONS

This notification lists only specific designations made under Rule 4.9(a) in the request. It is important to check that these designations are correct. Errors in designations can be corrected where precautionary designations have been made under Rule 4.9(b). The applicant is hereby reminded that any precautionary designations may be confirmed according to Rule 4.9(c) before the expiration of 15 months from the priority date. If it is not confirmed, it will automatically be regarded as withdrawn by the applicant. There will be no reminder and no invitation. Confirmation of a designation consists of the filing of a notice specifying the designated State concerned (with an indication of the kind of protection or treatment desired) and the payment of the designation and confirmation fees. Confirmation must reach the receiving Office within the 15-month time limit.

REQUIREMENTS REGARDING PRIORITY DOCUMENTS

For applicants who have not yet complied with the requirements regarding priority documents the following is recalled.

Where the priority of an earlier national (i.e., national or regional) application is claimed, the applicant must submit a copy of the said national application, certified by the authority with which it was filed ("the priority document") to the receiving Office (which will transmit it to the International Bureau) or directly to the International Bureau, before the expiration of 16 months from the priority date (Rule 17.1).

Where the priority document is issued by the receiving Office, the applicant may, instead of submitting the priority document, request the receiving Office to prepare and transmit the priority document to the International Bureau. Such a request must be made before the expiration of the 16-month time limit.

It is recalled that, where several priorities are claimed, the priority date to be considered for the purposes of computing the 16-month time limit is the filing date of the earliest application whose priority is claimed.

If the priority document concerned is not submitted to the International Bureau before the expiration of the 16-month time limit, or if the request to the receiving Office to transmit the priority document has not been made (and the corresponding fee, if any, paid) before the expiration of this time limit, any designated State may disregard the priority claim.

The communication will be made to those Offices only upon their request. Furthermore, those Offices do not require the applicant to furnish a copy of the international application (Rule 49.1(a-bis)).

3. Enclosed with this Notice is a copy of the international application as published by the International Bureau on 10 December 1998 (10.12.98) under No. WO 98/54995

REMINDER REGARDING CHAPTER II (Article 31(2)(a) and Rule 54.2)

If the applicant wishes to postpone entry into the national phase until 30 months (or later in some Offices) from the priority date, a **demand for international preliminary examination** must be filed with the competent International Preliminary Examining Authority before the expiration of 19 months from the priority date.

It is the applicant's sole responsibility to monitor the 19-month time limit.

Note that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination.

REMINDER REGARDING ENTRY INTO THE NATIONAL PHASE (Article 22 or 39(1))

If the applicant wishes to proceed with the international application in the **national phase**, he must, within 20 months or 30 months, or later in some Offices, perform the acts referred to therein before each designated or elected Office.

For further important information on the time limits and acts to be performed for entering the national phase, see the Annex to Form PCT/IB/301 (Notification of Receipt of Record Copy) and Volume II of the PCT Applicant's Guide.
